Dear colleagues!

NITA-FARM guided by a goal – to be a professional partner in providing veterinary products for livestock farming, has been in the business of creating unique products and improving on its professional activities for about a quarter of a century. This means our key responsibility to veterinary experts is simply the reliability of our medicines.

At our current stage of development as a company, we are striving at not only offering quality veterinary products, but also efficient services to our customers. Therefore, NITA-FARM proffers a comprehensive approach to the problems of livestock farming, while offering professional advice from our leading experts in veterinary, zootechnics and other related areas.

Our aim is to create a long-term strategic partnership capable of satisfying the urgent needs of our clients. Our unique educational project ANIMALPROFI - serves as a professional platform for exchange of ideas and experience, giving our customers an opportunity to dialogue with famous specialists in the industry.

In this edition, we intend to get you acquainted with our complex approach to work and the benefits and potentials we possess for sustainable development of our partnerships.

Yours sincerely,
Member of the board of directors,
PhD Chemistry
Oleg Zhukov

- JUSTICE
PRODUCTS AND DEVELOPMENTS

NITA-FARM develops and manufactures professional medicines in all major pharmaceutical groups for major animal species.

During product development, the company's scientists constantly monitor emerging risks for veterinary support.

The Company's experts have 16 world-class patents and most of the company's medicines (Sepranol, Ivermek-ON, Ivermek OR, Ferran, Ivermek, Nitox 200, Neozidin M, Florydox, e.t.c) are unique patented formulations of our experts.

Results of our scientific activities undergo compulsory testing at international conferences. More than 400 scientific reports have been published in special editions.
Our production system is certified by ISO 9001 and GMP is a warranty indicating consistency in the quality of NITA-FARM’s products.

NITA-FARM provides services for livestock farming, which doesn’t involve only professional veterinarians but also related areas of expertise for a comprehensive approach to problem solving.

We focus on the key characteristics of medicines which include; their therapeutic effectiveness, absolute reliability and reasonable application cost.
DISTINCTIVE ELEMENTS FOR PACKAGING

Each packaging has a factory branded "formula" made according to pharmaceutical color groups

- Antibacterial
- Anti-parasitic
- Obstetric and gynecological
- Vitamin and minerals
- Other pharmaceutical groups

Single laconic style

All NITA-FARM bottles have flip-caps with individual designs

Czech glass with an engraving
### Notion of animal groups
